

YOUR VIEW OF THE SITUATION

In Mowic Online, you get a real-time picture of your sensors together with historical data for a specific location.

Functions

See current values and history from sensors. Download data in excel format and .csv. See historical data from sensors (24h, 72h, 1v, 1 month, 1 year directly in the system.)

Examples of measured values:

- Rh/Temp
- Road temp/conductivity
- Surface temperataure
- Camera
- Wind
- Rain gauge
- Level (snow depth)
- Frost depth sensor

Measured values

Map service with view of current sensors and their values.

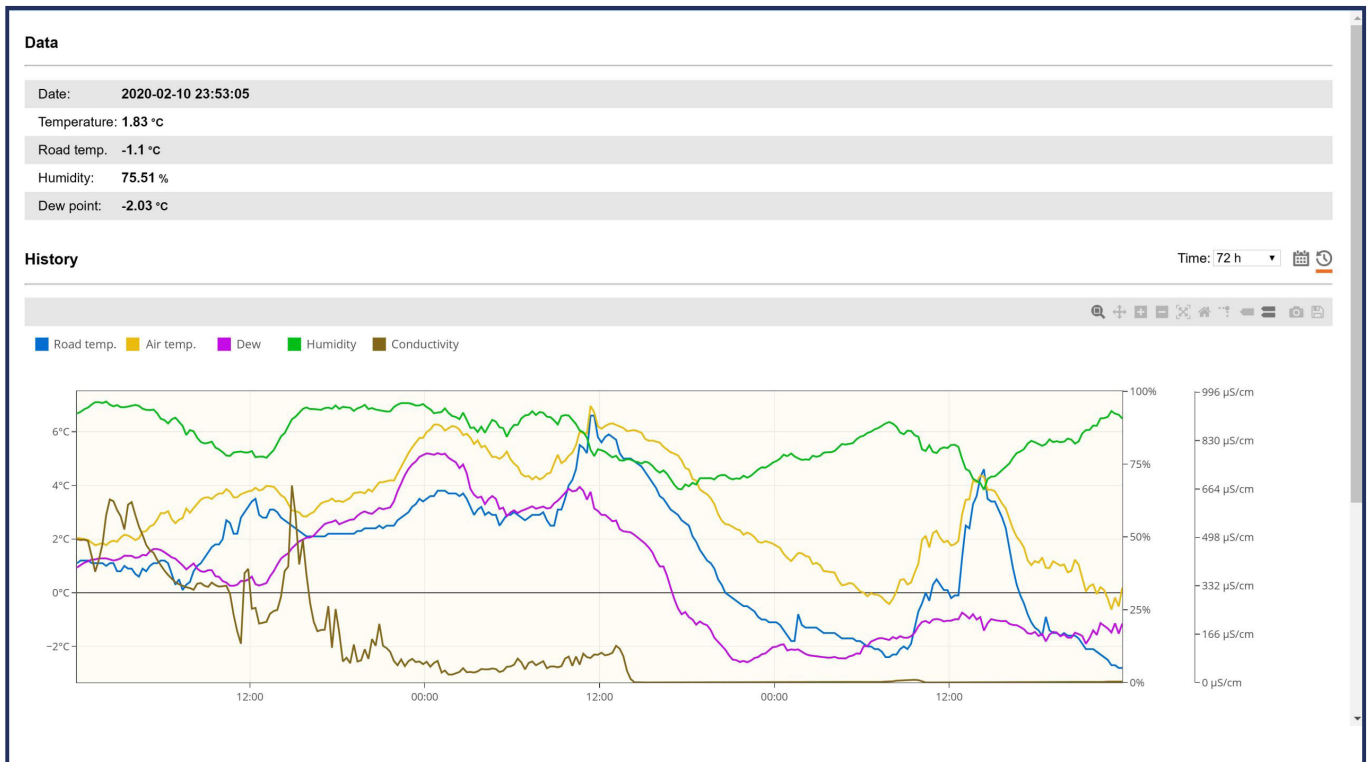

Plan

Get a real-time picture to facilitate which decision to make.

History

See historical values from 1 year back for all your sensors.

Data and measured values in the form of diagrams.
